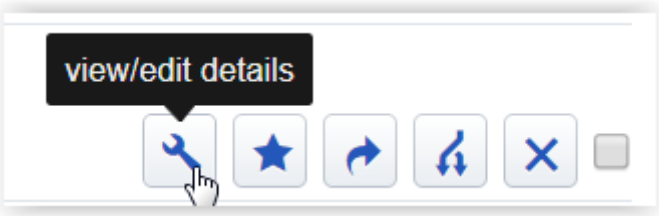
Installatron (一鍵安裝) 的功能

scicube 614 - 2023-03-14 - Directadmin

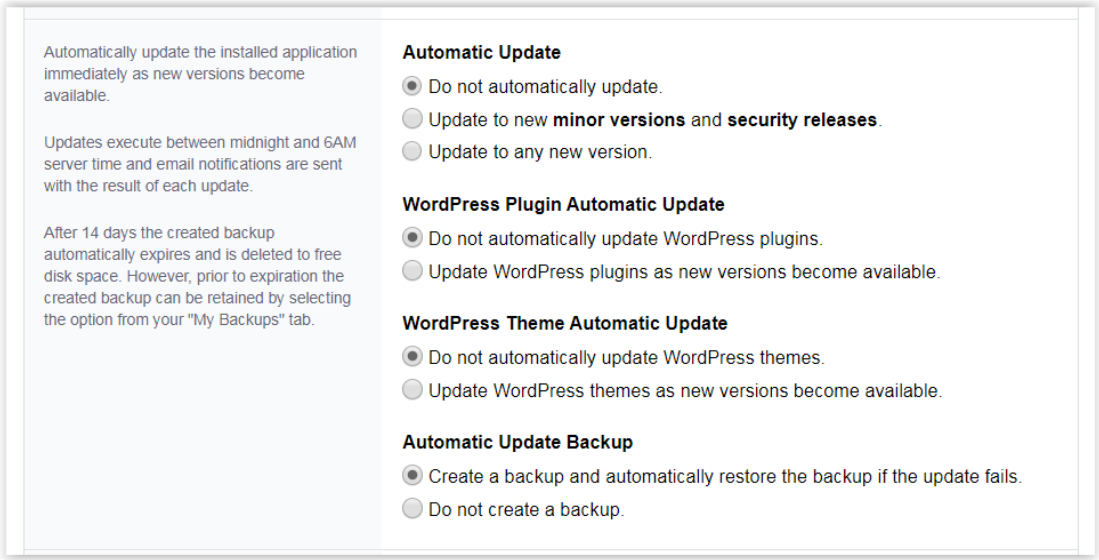
Installatron (一鍵安裝) 的功能

一鍵安裝除方便安裝一般開源軟體外，亦有兩大實用功能。

1) 安裝後，在 Directadmin 內 "Installatron Applications Installer"可看到已安裝程式列表，按相關程式旁邊的“士巴拿” 圖示



2) 首先會看到自動升級的功能，包括升級前可以自動進行備份，功能同時支援自動升級大部份 Wordpress Plugin 及 Theme



3) 最下方可以設定備份到不同地方

Change the location where backups are created for the installed application. Existing backups continue to work at the present location.

Default Backup Location

- ○ My web hosting account.
- ◉ Add a new backup location.

Protocol

- ◉ FTP
- ○ FTP with TLS/SSL
- ○ SFTP
- ○ WebDAV
- ○ Dropbox
- ○ Google Drive
- ○ Rackspace Cloud
- ○ Amazon S3

Server (IP Address or Hostname) | **Port**

Automatically maintain installed application backups based on a schedule.

Backups are created, rotated and deleted between midnight and 6AM server time, and a failed backup will never rotate a working backup.

Automatic Backup

- ◉ Do not automatically maintain backups.
- ○ 1 weekly + 1 monthly
- ○ 1 daily + 1 weekly + 1 monthly
- ○ 30 daily
- ○ 0 daily + 0 weekly + 0 monthly
