麻煩射擊 Troubleshooting - 連接域名到wix

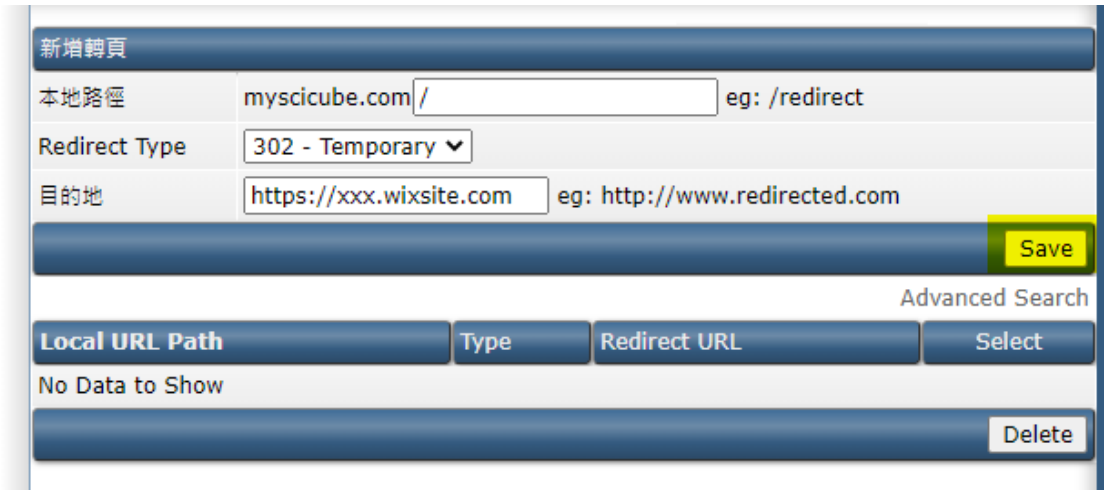
scicube602 - 2023-10-17 - Troubleshoot

首先需要了解的三件事

1. 其實scicube有提供類似wix 的 sitebuilder所有網頁寄存客戶(不包括虛擬主機及獨立主機客戶)均可**免費**使用，建議可以先試用一下才決定是否需要付費使用wix
   https://scicube.com/sitebuilder.php

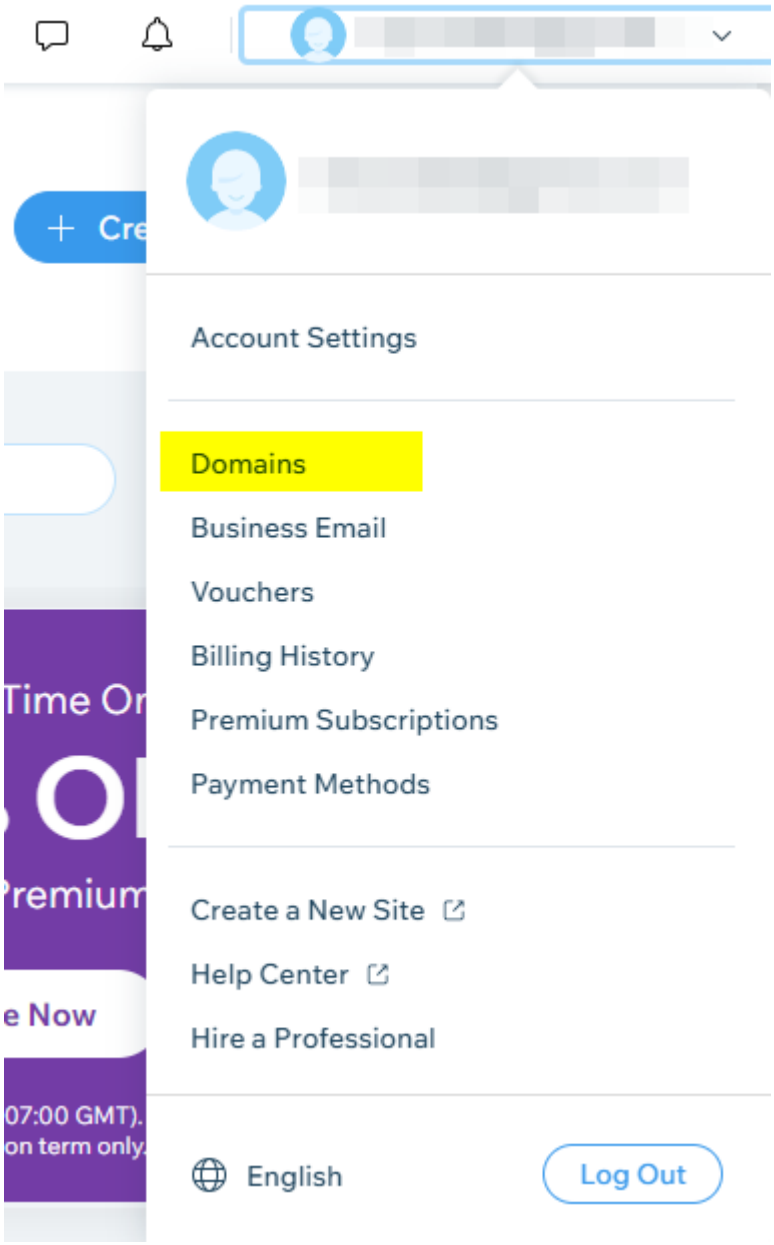
2. wix有分免費及付費(premium)只有付費版本可以連接域名。

3. 如使用免費版本，可以在Directadmin的管理轉頁，將域名轉址到指定的wixsite網址（如下圖）

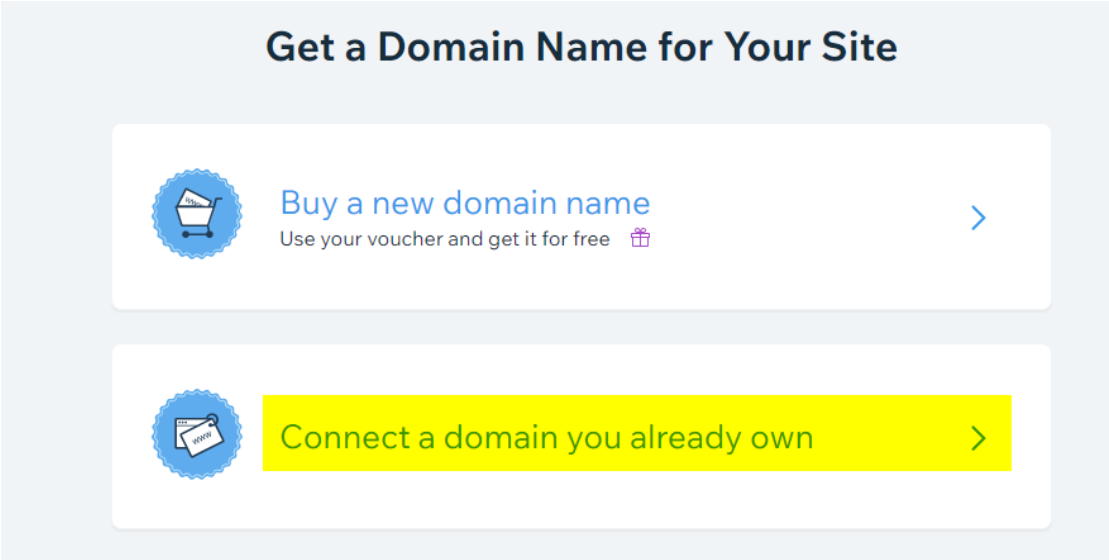


連接域名到wix premium網站步驟(假設域名經scicube註冊或已經指向scicube提供的DNS)

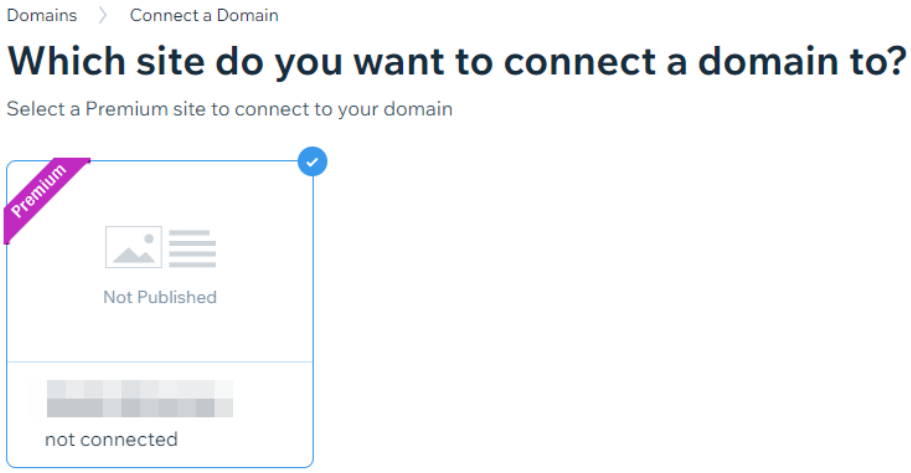
登入wix.com後，按右上方的戶口名稱或電郵地址，然後按"Domains"



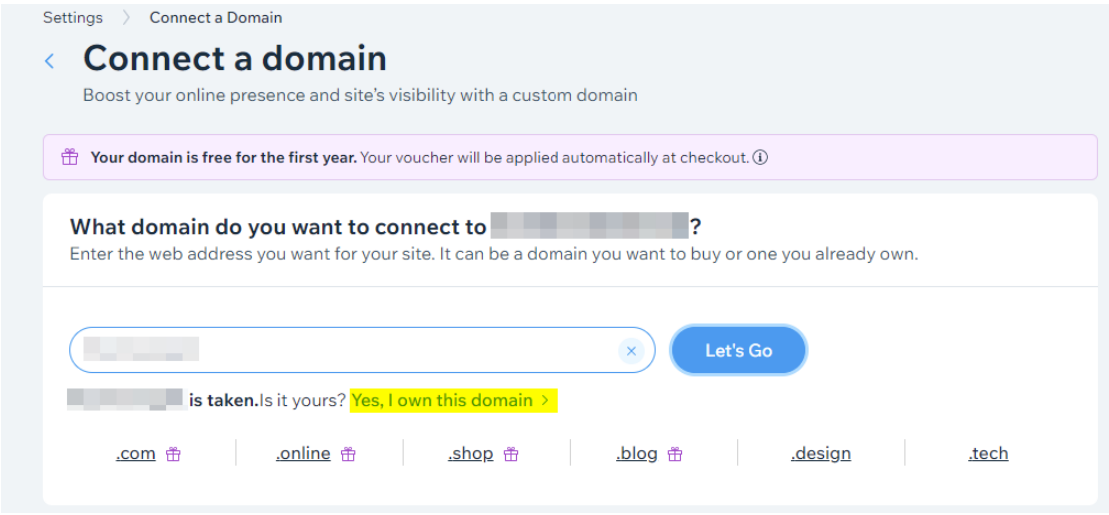
按”Connect a domain you already own”



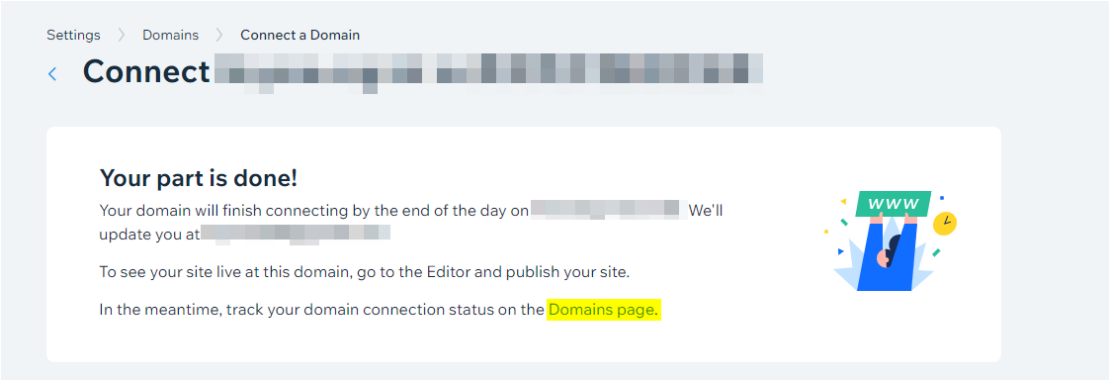
選擇好wix網站按connect/next



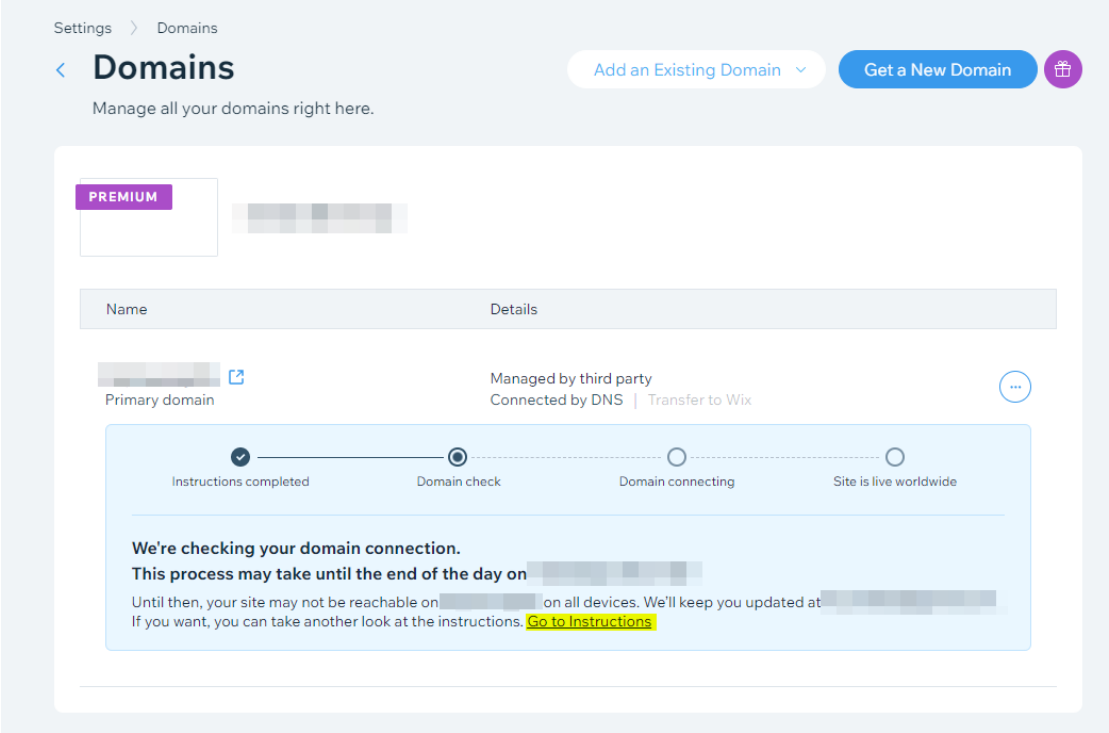
輸入域名名稱後按Let's Go再按"Yes, I own this domain"



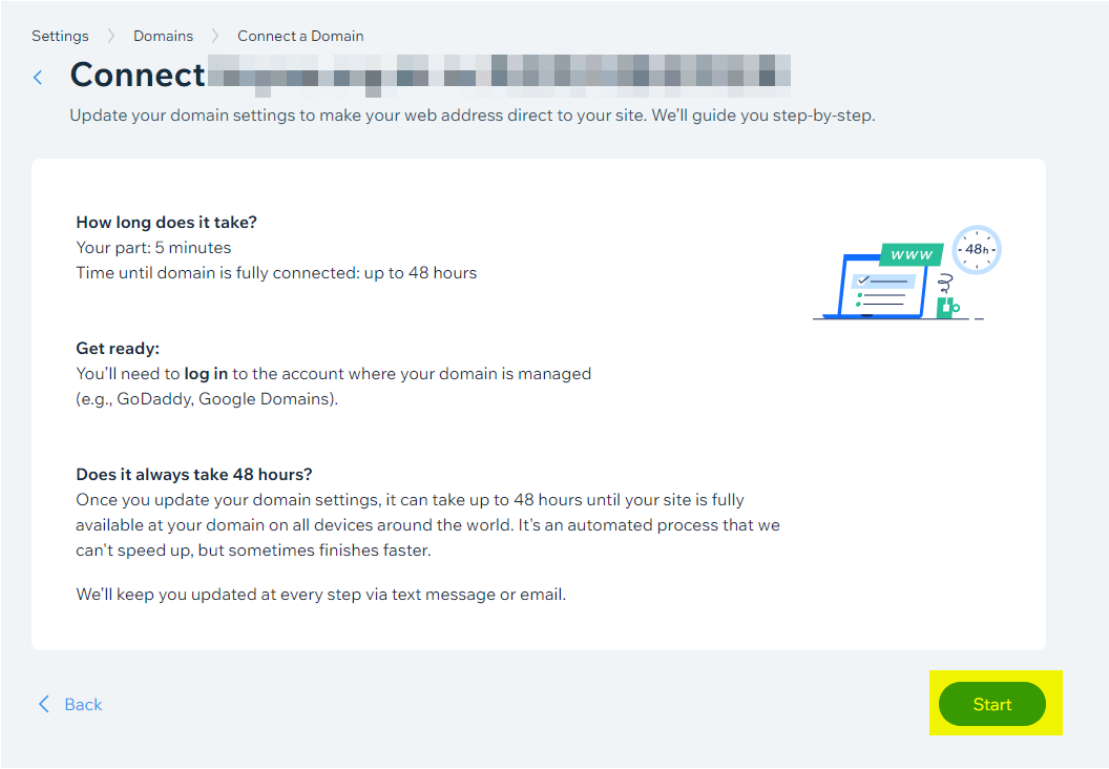
按Domains Page



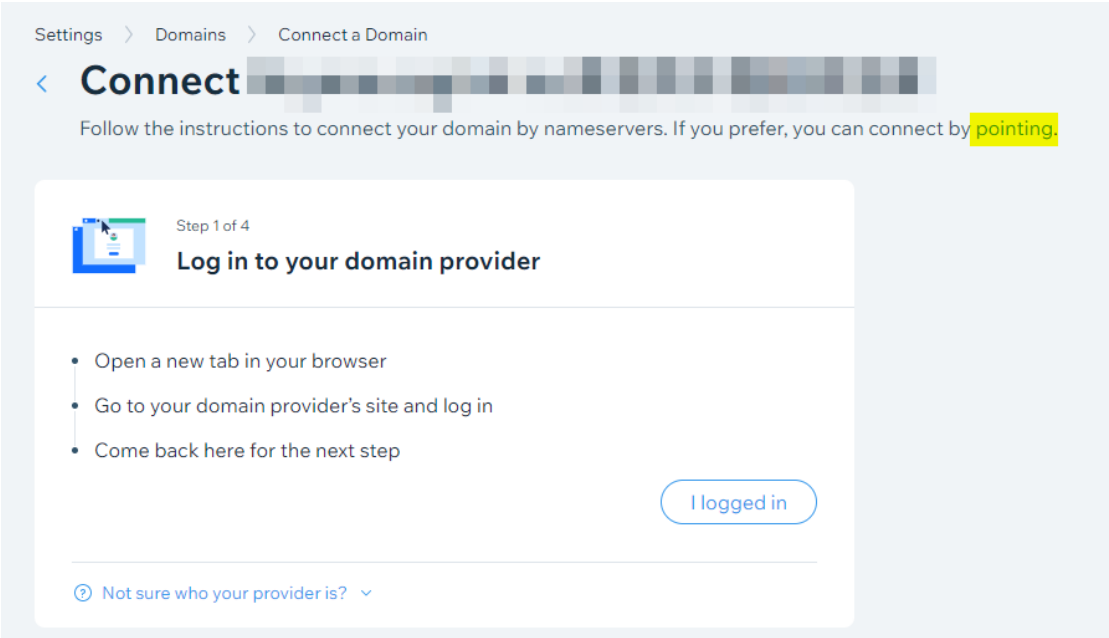
按Go To Instructions



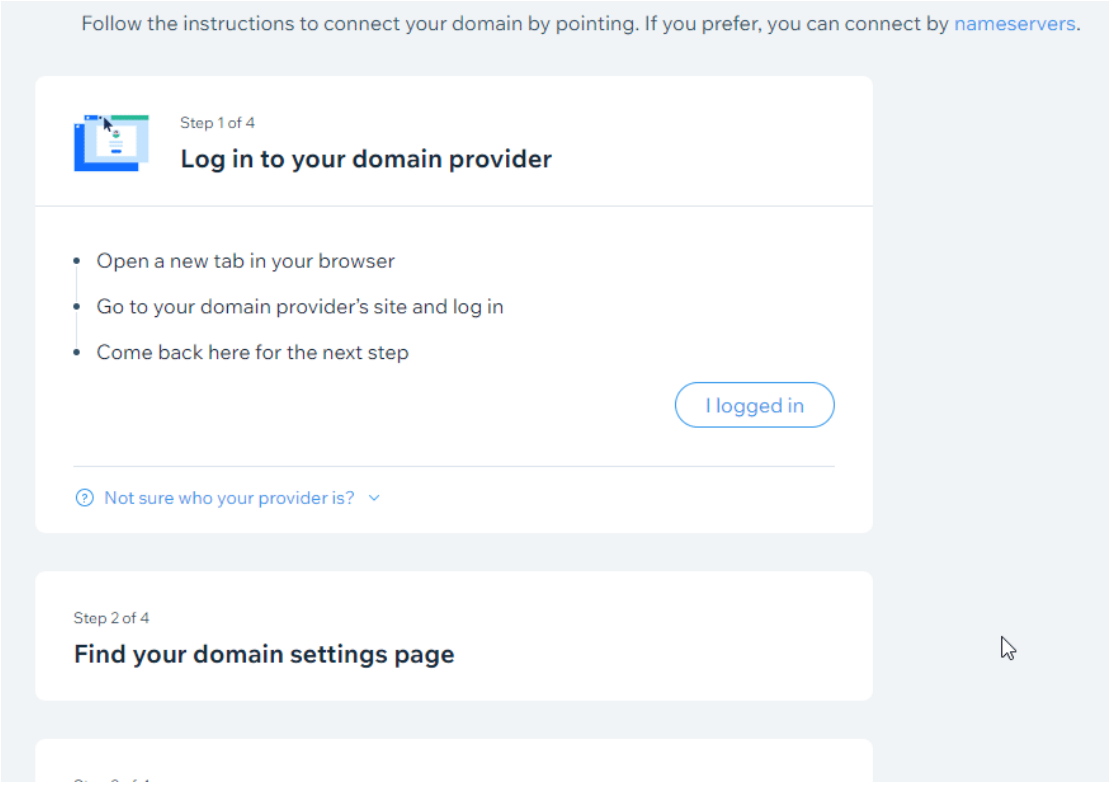
按Start



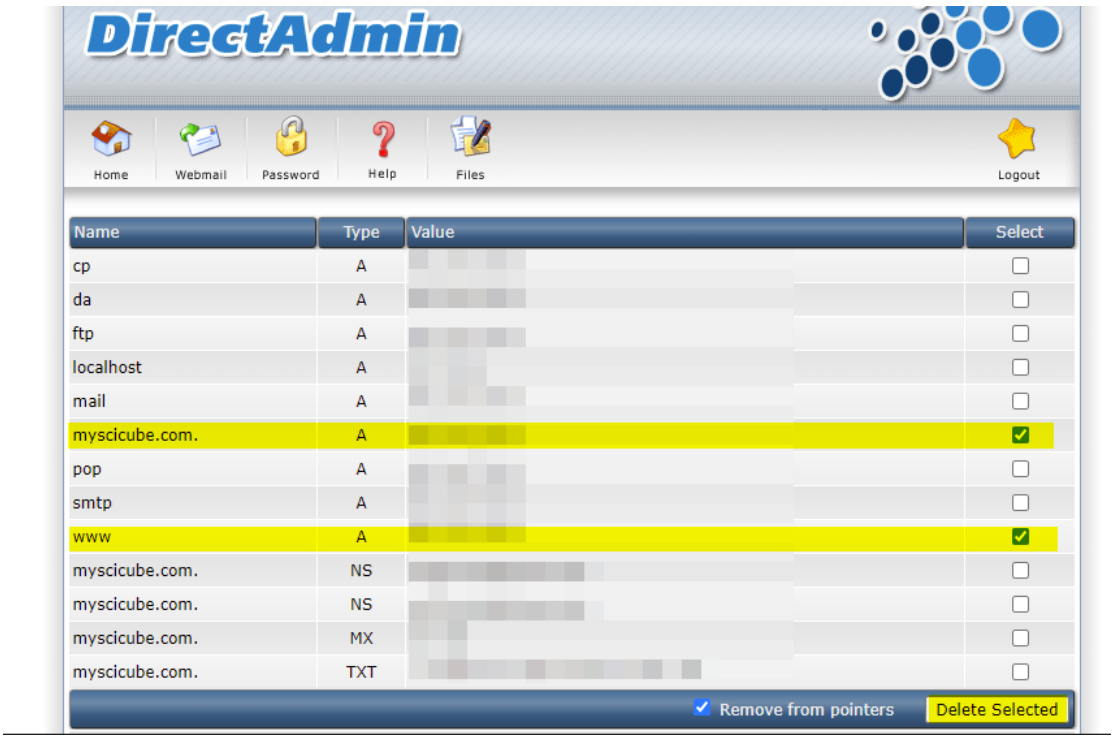
按pointing > switch to pointing instructions



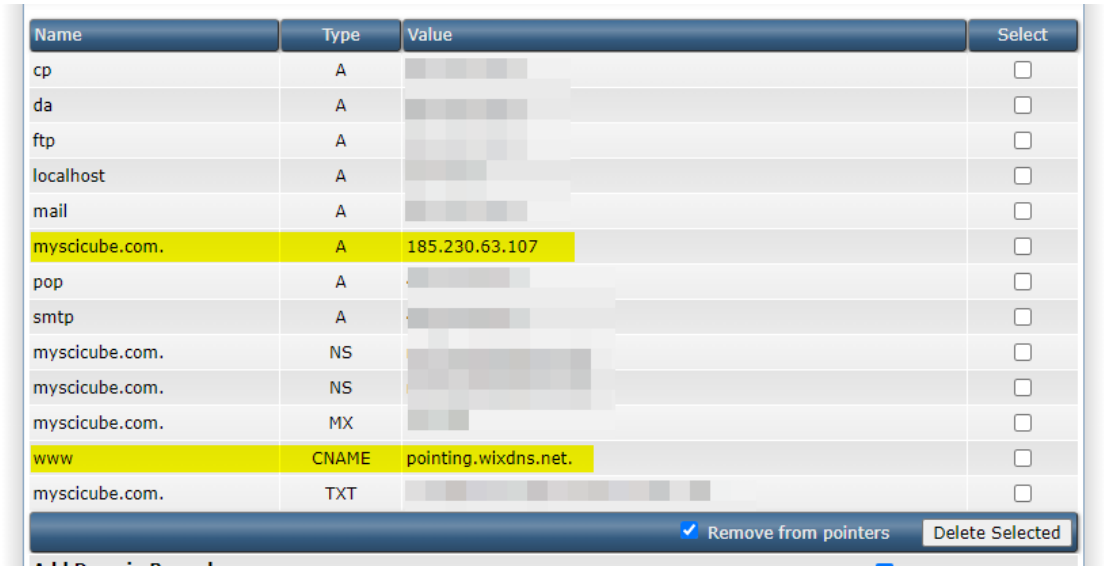
然後按指示到最後一步會看到wix 提供的DNS設定（下圖僅供參考，不同戶口的wix設定未必一樣）



取得設定後，回到Directadmin的DNS管理，刪除域名本身網站指向（即 DOMAIN.com跟 www.DOMAIN.com)



加回A 及CNAME Record就可以（留意CNAME 的Value需要有 . 作結尾 ）



Name	Type	Value	Select
cp	A		
da	A		
ftp	A		
localhost	A		
mail	A		
myscicube.com.	A	185.230.63.107	
pop	A		
smtp	A		
myscicube.com.	NS		
myscicube.com.	NS		
myscicube.com.	MX		
www	CNAME	pointing.wixdns.net.	
myscicube.com.	TXT		

Remove from pointers | Delete Selected

完成設定後大概數小時便可使用。
