

## 麻煩射擊 Troubleshooting - 連接域名到wix

scicube602 - 2023-10-17 - Troubleshoot

### 首先需要了解的三件事

1. 其實scicube有提供類似wix 的 sitebuilder[]所有網頁寄存客戶(不包括虛擬主機及獨立主機客戶)均可**免費**使用，建議可以先試用一下才決定是否需要付費使用wix  
<https://scicube.com/sitebuilder.php>
2. wix有分免費及付費(premium)[]只有付費版本可以連接域名。
3. 如使用免費版本，可以在Directadmin的管理轉頁，將域名轉址到指定的wixsite網址（如下圖）

新增轉頁

本地路徑  eg: /redirect

Redirect Type

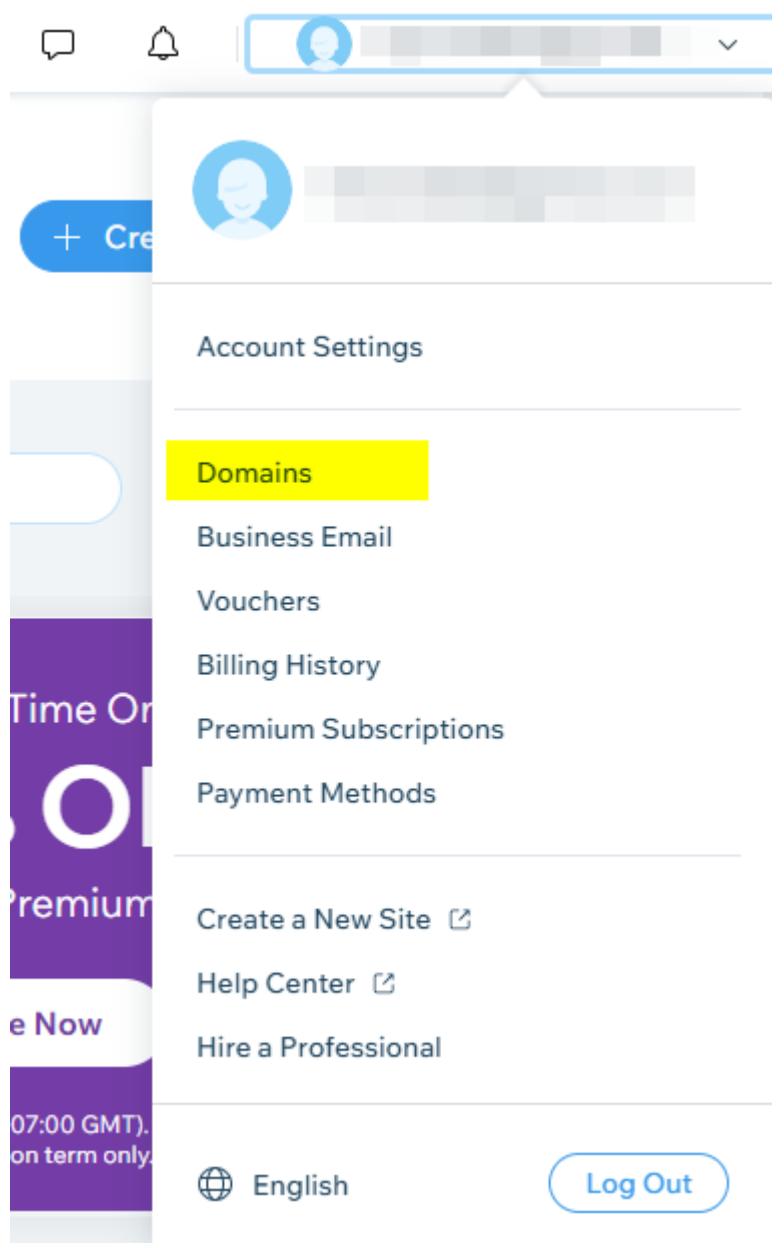

目的地  eg: http://www.redirected.com

Advanced Search

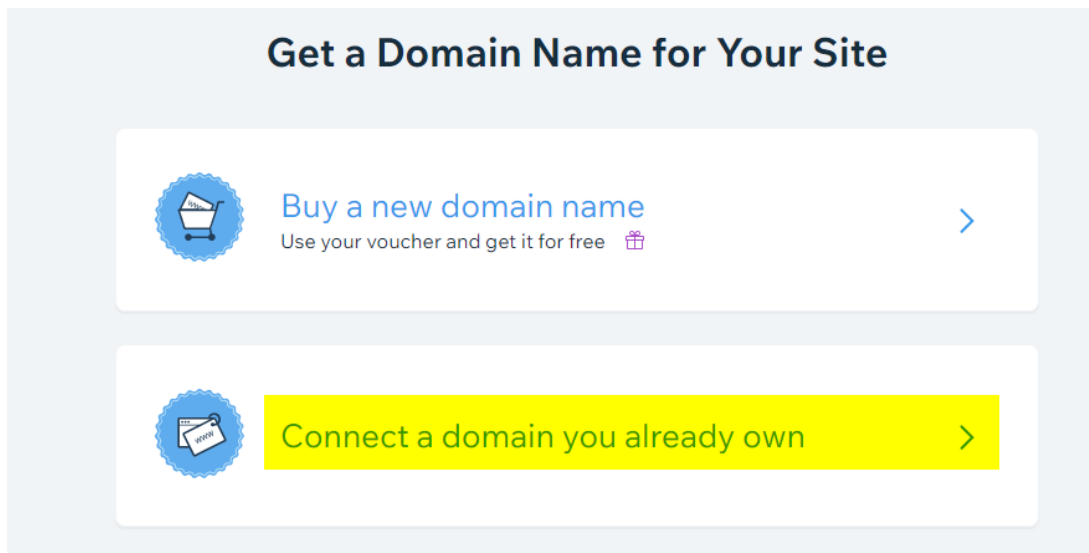

Local URL Path	Type	Redirect URL	Select
No Data to Show			

### 連接域名到wix premium網站步驟(假設域名經scicube註冊或已經指向scicube提供的DNS)

登入wix.com後，按右上方的戶口名稱或電郵地址，然後按“Domains”

按” Connect a domain you already own”

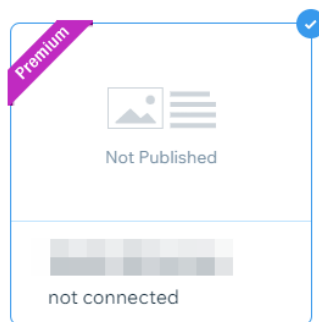

選擇好wix網站按connect/next

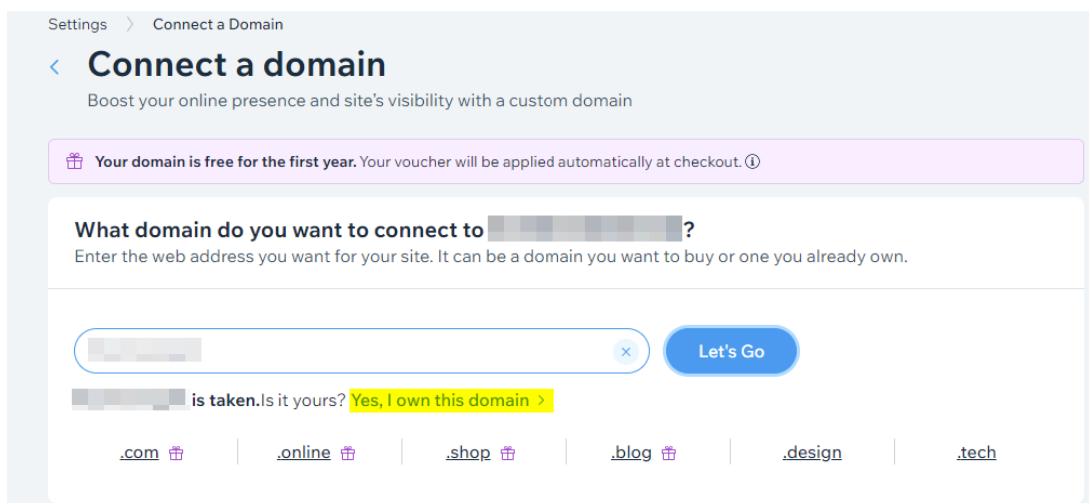

Domains > Connect a Domain

## Which site do you want to connect a domain to?

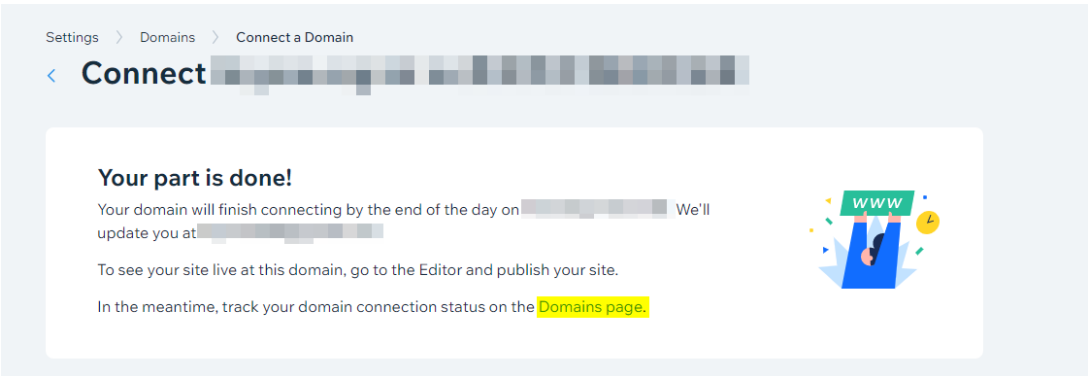

Select a Premium site to connect to your domain

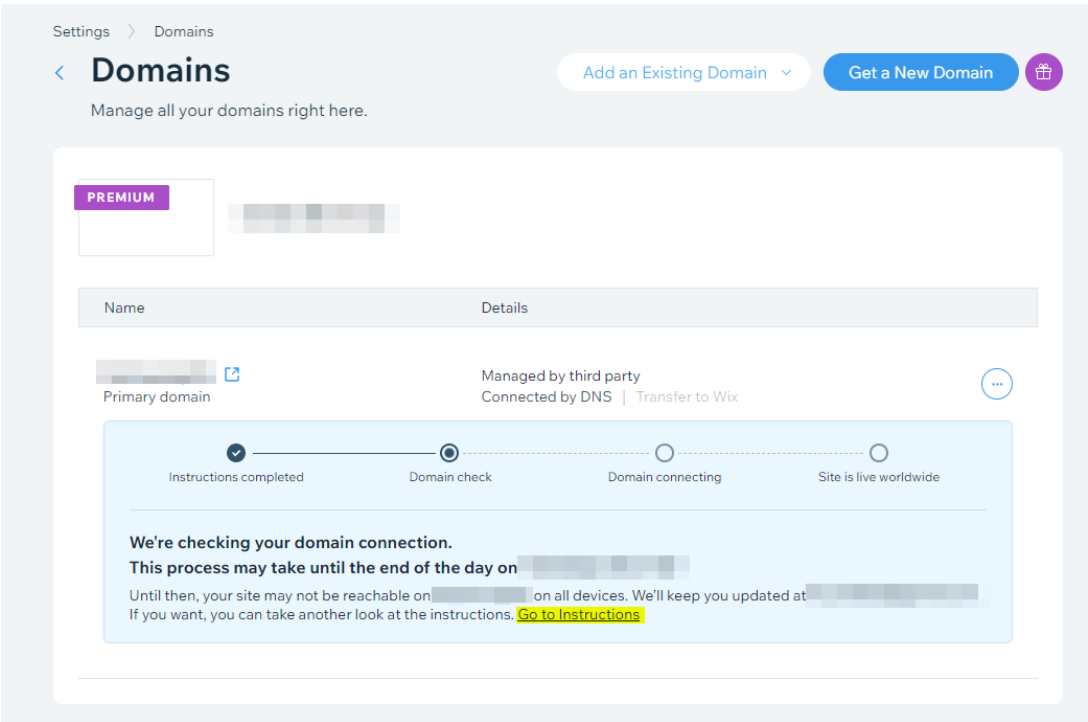

輸入域名名稱後按Let's Go再按"Yes, I own this domain"

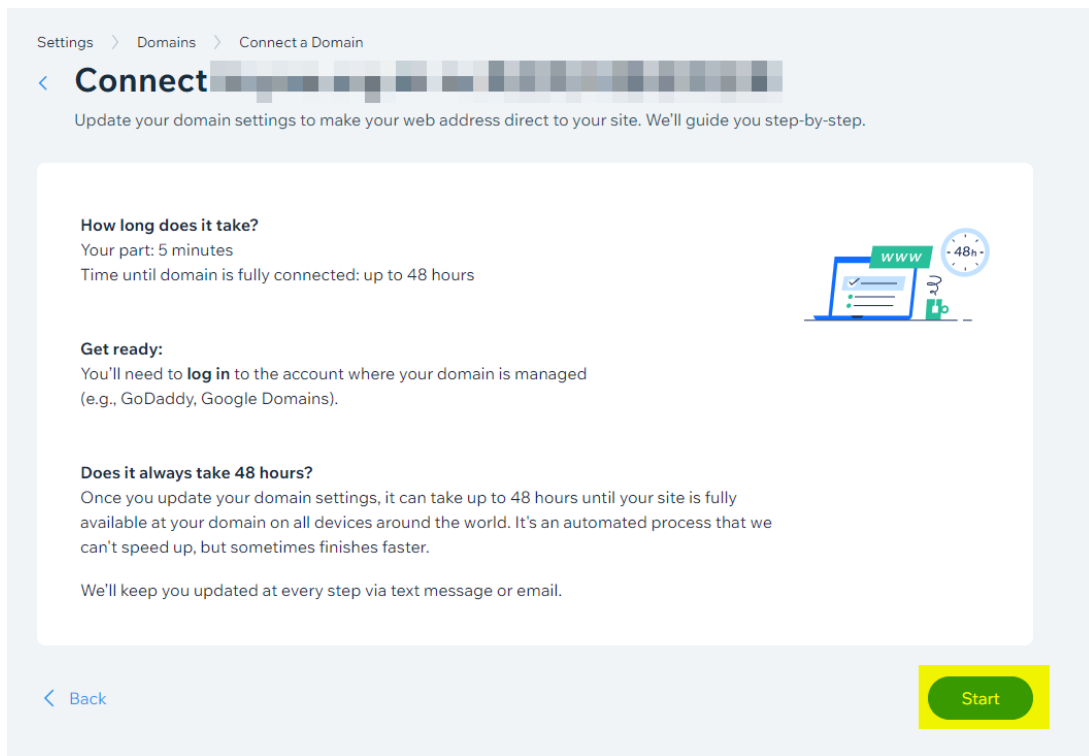

按Domains Page

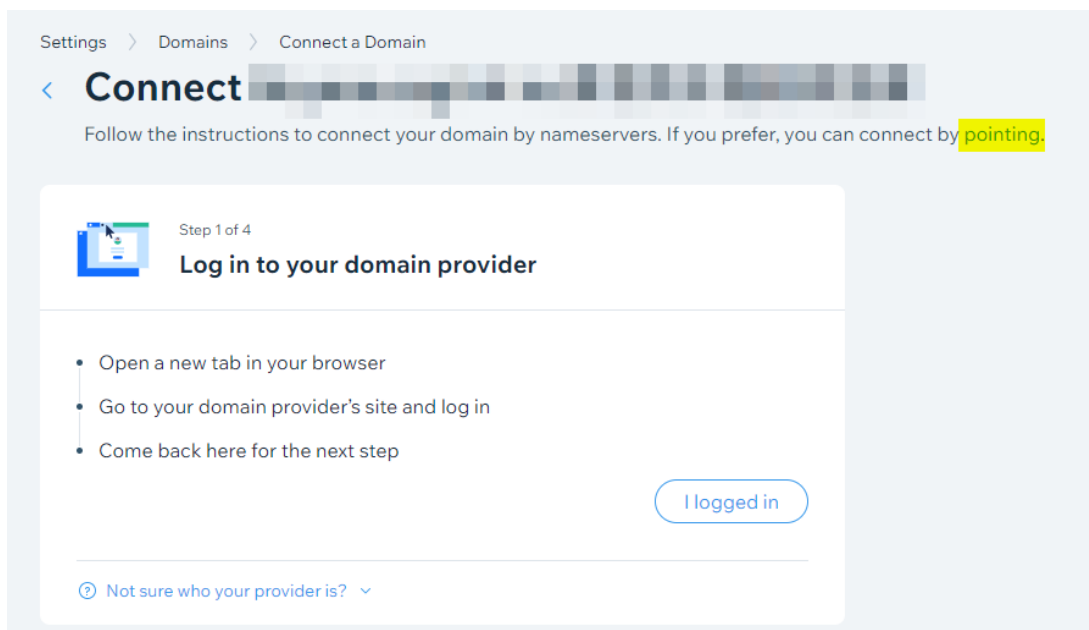

按Go To Instructions

按Start

按pointing > switch to pointing instructions

然後按指示到最後一步會看到wix 提供的DNS設定（下圖僅供參考，不同戶口的wix設定未必一樣）

Follow the instructions to connect your domain by pointing. If you prefer, you can connect by [nameservers](#).

 Step 1 of 4  
**Log in to your domain provider**

- Open a new tab in your browser
- Go to your domain provider's site and log in
- Come back here for the next step

I logged in

Not sure who your provider is? ▾

Step 2 of 4  
**Find your domain settings page**

取得設定後，回到Directadmin的DNS管理，刪除域名本身網站指向（即 DOMAIN.com跟 [www.DOMAIN.com](http://www.DOMAIN.com)）

**DirectAdmin**

 Home  Webmail  Password  Help  Files  Logout

Name	Type	Value	Select
cp	A		<input type="checkbox"/>
da	A		<input type="checkbox"/>
ftp	A		<input type="checkbox"/>
localhost	A		<input type="checkbox"/>
mail	A		<input type="checkbox"/>
myscicube.com.	A		<input checked="" type="checkbox"/>
pop	A		<input type="checkbox"/>
smtp	A		<input type="checkbox"/>
www	A		<input checked="" type="checkbox"/>
myscicube.com.	NS		<input type="checkbox"/>
myscicube.com.	NS		<input type="checkbox"/>
myscicube.com.	MX		<input type="checkbox"/>
myscicube.com.	TXT		<input type="checkbox"/>

☒ Remove from pointers

加回A 及CNAME Record就可以（留意CNAME 的Value需要有 . 作結尾）

Name	Type	Value	Select
cp	A		<input type="checkbox"/>
da	A		<input type="checkbox"/>
ftp	A		<input type="checkbox"/>
localhost	A		<input type="checkbox"/>
mail	A		<input type="checkbox"/>
myscicube.com.	A	185.230.63.107	<input type="checkbox"/>
pop	A		<input type="checkbox"/>
smtp	A		<input type="checkbox"/>
myscicube.com.	NS		<input type="checkbox"/>
myscicube.com.	NS		<input type="checkbox"/>
myscicube.com.	MX		<input type="checkbox"/>
www	CNAME	pointing.wixdns.net.	<input type="checkbox"/>
myscicube.com.	TXT		<input type="checkbox"/>
			<input checked="" type="checkbox"/> Remove from pointers <input type="button" value="Delete Selected"/>

完成設定後大概數小時便可使用。
