我的域名未開通，有辦法瀏覽我的網站資料嗎？

scicube 614 - 2023-03-14 - Directadmin

我的域名未開通，有辦法瀏覽我的網站資料嗎？

閣下可使用以下連結預覽網站資料。

`http://[IP地址]/~[登入名稱]`

例如 `http://123.123.123.XXX/~username`

請分別以閣下伺服器的 IP 地址及登入名稱代表括號的文字

詳情請參考設定指引內的 IP 地址及登入名稱

如果域名多於一個，臨時連結會指向預設域名，更改預設域名可以在 **Domain Setup / 域名設定** 內，剔選域名後按 "Set as default" 便可。

The screenshot shows a web interface for managing domains. At the top, it says "Add Another Domain" and "Change a Domain Name". There is an "Advanced Search" link. Below is a table with columns: Domain, Bandwidth, Disk Usage, Subdomains, Suspended, and Select. The table lists three domains: a.com, b.com, and c.com. At the bottom, there are buttons for "With Selected", "Set as Default", "Suspend / Unsuspend", and "Delete", along with a "Reason" dropdown menu.

Domain	Bandwidth	Disk Usage	Subdomains	Suspended	Select
a.com	0.0 / unlimited	0.0 / unlimited	0	No	<input type="checkbox"/>
b.com	0.0 / unlimited	0.0 / unlimited	0	No	<input type="checkbox"/>
c.com	0.0 / unlimited	0.0 / unlimited	0	No	<input type="checkbox"/>

With Selected Set as Default or Suspend / Unsuspend -- Reason: or Delete
